SUMMARY

Skilled in developing responsive and visually appealing user interfaces using React and Tailwind CSS. Experienced in implementing frontend functionalities and ensuring seamless integration for enhanced user experience. Proficient in utilizing Firebase Authentication to secure user login and integrating frontend with backend services using Node.js and Express.js. Familiar with managing MongoDB databases to support application data needs.

PROJECTS

1. Case Craftopia – Custom Phone Case Design Website

Key Features:

- **User-Driven Customization:** Users can upload photos to design their own custom cases.
- **Secure Authentication:** Integrated Firebase for robust user authentication and data security
- **Database Management:** Utilized MongoDB for efficient storage and retrieval of user data.
- **Technologies Used:**
 - Frontend: React, TailwindCss, JavaScript
 - Backend: Nodejs, Express.js , Firebase Authentication
 - Database: MongoDB
- **GitHub Repository Client side Link :** [Case Craftopia Client](#), **GitHub Repository Server side Link :** [Case Craftopia Server](#)
- **Live site:**

2. Plate Pal – Recipe Sharing Platform

Key Features:

- **User-Driven Recipe Sharing:** Users can create, share, and explore recipes with detailed ingredients and instructions.
- **Secure Authentication:** Implemented Firebase and JWT token authentication for robust user login and session management.
- **Search Functionality:** Integrated search functionality for users to easily find recipes based on keywords, ingredients, or categories.
- **Database Management:** Utilized MongoDB for efficient storage and retrieval of recipe data, ensuring scalability and performance.
- **Technologies Used:**
 - Frontend: React, Tailwind CSS, React Router DOM, JavaScript
 - Backend: Node.js, Express.js
 - Authentication: Firebase Authentication, JWT Tokens
 - Database: MongoDB
- **GitHub Repository Client side Link :** [Plate Pal Client](#), **GitHub Repository Server side Link :** [Plate Pal Server](#)
- **Live Site:**
